My Community. My Library. My Story.

Please help us preserve library state funding!

We understand difficult financial challenges. These challenges are exactly why it is critically important to ensure continued financial support of our public libraries. From technology access to one-on-one job search assistance to early literacy activities that prepare students for school to classes and workshops that promote brain health in our seniors, library staff serve their communities face-to-face, right where they live.

Contact your elected officials to voice your support of libraries to keep their buildings open & preserve our level of excellence!
